

Sanjaya Kumar Mahapatra

Cloud DevOps Engineer

Phone No: +91 9168693220 **Email Id:** mahapatra.sanjay@gmail.com **Address:** Pune, India

Highly motivated DevOps Engineer with 19+ years of experience in cloud infrastructure, CI/CD, and automation; seeking a Cloud DevOps Engineer role in the Telecommunications industry to drive secure, scalable, and optimized enterprise solutions. Expertise in leveraging AWS, Azure, and OCI to enhance deployment efficiency, system health, and disaster recovery strategies for large-scale telecom infrastructures.

PROFESSIONAL SUMMARY

- Experienced DevOps Engineer specializing in cloud infrastructure, automation, and data protection across diverse environments.
- Proficient in designing, deploying, and managing Kubernetes clusters (EKS, OKE, AKS) supporting microservices architecture.
- Expertise in implementing and managing CI/CD pipelines using GitHub Actions and GitOps principles with ArgoCD.
- Hands-on experience with Terraform for infrastructure provisioning and automation, ensuring scalable and secure cloud deployments on OCI.
- Deep knowledge of enterprise backup and data protection platforms, including EMC NetWorker, Avamar, Data Domain, and Cohesity.
- Skilled in configuring monitoring and logging solutions with Prometheus and Grafana for proactive system health checks and rapid diagnostics.
- Strong understanding of disaster recovery planning and implementation, ensuring business continuity and data integrity.
- Proven ability to manage large-scale data center operations and drive data center transformation initiatives.
- Proficient in scripting languages (Shell/Bash) and operating systems (Linux, Windows Server, SunOS).
- Certified in Microsoft Azure and AWS Solution Architecture, with a strong foundation in ITIL 4 and Six Sigma methodologies.

SKILLS

Technical Skills: Kubernetes, Docker, Terraform, AWS, Azure, OCI, GitHub Actions, ArgoCD, CI/CD, GitOps

Core Competencies: Cloud Infrastructure Management, Automation & Orchestration, Data Protection Strategy, DevOps Implementation, System Monitoring & Optimization

Soft Skills: Team Leadership, Stakeholder Management, Problem Solving, Communication, Adaptability

WORK EXPERIENCE

Devops Engineer	Apr 2022 - Present
VOIS, Pune (Pune)	
Responsible for cloud infrastructure management, CI/CD pipeline automation, and Kubernetes cluster administration within the organization.	
- Engineered and managed cloud infrastructure on OCI utilizing Terraform, optimizing deployment workflows and minimizing manual overhead. - Developed and maintained CI/CD pipelines using GitHub Actions, ensuring secure and streamlined code deployments across multiple environments. - Implemented GitOps methodologies with ArgoCD for automated Kubernetes deployments, enhancing deployment consistency and version control. - Architected, deployed, and oversaw Kubernetes clusters (EKS and OKE) to support microservices architecture and scalable infrastructure solutions. - Managed containerized applications with Docker, Helm charts, and Kubernetes manifests, ensuring efficient scaling, high availability, and fault tolerance. - Implemented robust monitoring and logging solutions with Prometheus and Grafana, enabling proactive system health checks and diagnostics.	
Achievements:	
- Significantly enhanced deployment efficiency by automating infrastructure provisioning using Terraform. - Improved system reliability through proactive monitoring and automated alerts, reducing downtime.	
Data Protection Administrator	Nov 2014 - Apr 2022
VOIS, Pune (Pune)	

Responsible for infrastructure and data center management, cloud operations, backup and recovery architecture, and end-user computing environments.

- Oversaw infrastructure and data center operations across 52 data zones supporting global locations, ensuring high availability and performance.
- Managed public and private cloud environments, including Azure infrastructure services, storage, backup, restore, and site-to-site replication.
- Designed and implemented backup architecture and policies, including scheduling, retention, replication, NDMP, VTL/PTL, and integrations with enterprise storage.
- Implemented and supported enterprise backup and data protection platforms, including EMC NetWorker, Avamar, Data Domain, and Cohesity, covering end-to-end operations.
- Architected disaster recovery strategies with defined RPO/RTO across data center, cloud, and EUC environments, ensuring business continuity.
- Led a team responsible for project execution, SLA compliance, stakeholder coordination, and service delivery excellence.

Achievements:

- Successfully drove data center transformation, consolidation, and virtualization initiatives across multiple locations improving resource utilization as well as cost optimization.
- Enhanced data protection strategies resulting in improved RTOs for critical systems.

Technical Specialist

Jun 2012 - Oct 2014

HCL Technologies Ltd., Chennai (Chennai)

Provided technical expertise in backup and storage solutions, ensuring data protection and availability for global projects.

- Supported multiple global projects, functioning as a Backup & Storage SME within HCL premises.
- Managed Data Center backup and storage environments across multiple customer accounts, ensuring data integrity and availability.
- Administered EMC Legato Networker, NetBackup, and related backup technologies across a substantial infrastructure, effectively managing data protection services.
- Executed File System Backup & Disaster Recovery tasks, maintaining business continuity and adherence to recovery objectives.
- Oversaw SAN/DAS storage devices, tape libraries, and Data Domain, optimizing storage solutions contributing to improved efficiency.
- Conducted backup monitoring and troubleshooting using VMware technology and EMC Networker Management Console (NMC).

Achievements:

- Enhanced efficiency in backup monitoring by implementing automation using VMware technology and EMC Networker Management.
- Streamlined Data Center processes by managing backup and storage environments across multiple customer accounts.

Senior Customer Executive / Backup & System Administrator

Nov 2008 - May 2012

TATA ELXSI Ltd., Mumbai (Mumbai)

Responsible for backup operations, IT infrastructure, and data center management for enterprise clients, acting as a third-party vendor.

- Managed backup operations, monitoring, and failure resolution, ensuring data integrity and availability for enterprise clients.
- Configured and supported backup environments, providing reliable data protection solutions.
- Provided IT infrastructure and data center management services, maintaining operational efficiency and stability.
- Delivered automobile application management.
- Asset and desktop application support for multiple clients.

Achievements:

- Improved data retrieval efficiency by streamlining backup operations.
- Ensured seamless and secure customer support

CIR

Dec 2007 - Oct 2008

Unisys India (P) Ltd. Mumbai (Mumbai)

Responsible for maintaining Unisys Mainframe systems and managing backup processes to support critical aviation applications.

- Maintained Unisys Mainframe systems, ensuring smooth operation of critical applications.
- Managed backup systems, protecting data and facilitating disaster recovery.
- Supported aviation applications for Indian Airlines, contributing to passenger services, scheduling, and backend operations.

Achievements:

- Ensured continued operational efficiency of critical applications by maintaining consistent operations.
- Streamlined backups on aviation systems to promote effective data protection and recovery.

System Administrator

Aug 2006 - Dec 2007

IMCL, Mumbai (Mumbai)

Responsible for overall system administration and maintenance.

	Responsible for overall system administration and maintenance. Administered and maintained systems infrastructure.	
	Achievements: Ensured seamless system operations and reliable data infrastructure.	
	Customer Support Executive PCS Technology, Mumbai (Mumbai)	Jun 2005 - Aug 2006
	Responsible for delivering quality customer support and resolving technical issues. Provided customer support, assisting clients with technical issues and inquiries. Achievements: - Contributed towards improved customer satisfaction by providing reliable technical support. - Ensured customers receive prompt and effective assistance.	
	FMS Support Engineer Trimax Computer Ltd, Mumbai (Mumbai)	Jan 2004 - Apr 2005
	Responsible for providing Facilities Management Services (FMS) support to clients. Provided FMS (Facilities Management Services) support, addressing technical issues within client facilities. Achievements: - Supported streamlined facilities operations through timely resolution of technical issues. - Contributed to enhanced client satisfaction by providing consistent and reliable FMS support.	

EDUCATION

Bachelor of Science
Utkal University, Bhubaneswar, Bhubaneswar
(Jun 1996 - May 1999)

MCA
Punjab Technical University
(Apr 2007 - Jul 2010)

ACHIEVEMENTS

- Six Sigma - Yellow Belt: Demonstrates commitment to process improvement and efficiency in IT operations.
- ITIL 4 Foundation: Certified in IT Service Management best practices.

Certifications

- Associate Level Certification** (Microsoft Azure)
- Solution Architect Level Certification** (Microsoft Azure)
- Solution Architect Associate** (AWS)
- MCSE** (Microsoft)
- CCNA** (Cisco)
- Six Sigma - Yellow Belt**
- ITIL 4 Foundation**

Projects

GitOps-Based Kubernetes Deployment (EKS + ArgoCD + CI/CD)

- Project: GitOps-Based Kubernetes Deployment (EKS + ArgoCD + CI/CD)
- Designed and implemented an end-to-end GitOps workflow, enabling automated Kubernetes deployments on Amazon EKS.
- Integrated GitHub Actions CI/CD pipeline with code push and pull request triggers, streamlining build, test, and deployment processes.
- Incorporated SonarQube and Trivy, ensuring code quality and security compliance through static code analysis and container security scanning.
- Enabled multi-environment deployment (Dev, QA, Staging, Production) with automated promotion and approval workflows, providing seamless application lifecycle management.

- Configured Slack notifications, providing real-time deployment status and pipeline alerts, enhancing team collaboration and responsiveness.
- Improved deployment consistency, minimal manual interventions, and enabled fast rollback and version control.
- Automated end-to-end infrastructure provisioning for multi-environment setups (Dev, QA, Staging, Prod).
- Implemented Infrastructure as Code (IaC) practices incorporating version control, state management, and environment isolation, enhancing scalability and reliability.
